PROFESSIONAL SUMMARY

Computer Science Engineering student passionate about backend systems, scalable APIs, AI-powered applications, and cloud technologies. Experienced in building full-stack and performance-focused projects using Spring Boot, Node.js, Redis, and React. Seeking software engineering opportunities to apply problem-solving and system design skills.

EDUCATION

Sri Krishna College of Technology — Coimbatore
B.E. Computer Science and Engineering | ***CGPA: 6.91*** — 2023 - 2027

SMBM National Public School — Dindigul
Higher Secondary School Education (HSC) | ***76.8%*** — 2023

TECHNICAL SKILLS

- **Languages** : C++, Java (Basics), Python (Basics)
- **Web Development** : HTML, CSS, JavaScript, React (Basics), Bootstrap
- **Backend** : Spring Boot, REST APIs , REDIS
- **Tools& Technologies** : Git, GitHub, Postman, Docker (Basics), AWS (Basics)
- **Soft Skills** : Communication,Teamwork, Problem Solving, Quick Learning, Adaptability

EXPERIENCE

Accento Techno Soft *(Python Developer Intern)* — 2024 MAY

- Developed an AI-powered Business Plan Generator using Python, integrating NLP/AI APIs to generate structured business strategies.
- Built an interactive interface using Streamlit/Flask and implemented data processing techniques to improve output accuracy.

PROJECTS

Employee Attendance System – REST API Project

- Built a REST API using Java and Spring Boot to manage employee details and attendance.
- Implemented CRUD endpoints and operations for storing and retrieving data

AI Business Plan Generator – AI Web App

- Built and deployed a Streamlit + Python AI application using Grok API to generate complete business plans from user inputs, with downloadable outputs (PDF/DOCX); live at: https://aibusinessplangenerator.streamlit.app/

CacheFlow – High-Performance API Caching & Analytics Engine

- Developed a low-latency API caching engine using Node.js and Fastify, integrating Redis to reduce repeated request response times by over 90%.
- Live at: https://cacheflow-engine.onrender.com/docs |
- Real-time observability dashboard - https://cacheflow-engine.onrender.com/dashboard/
