CAREER OBJECTIVE

A student in Computer Science Engineering with a strong background in programming, RESTful API development, and software problem-solving is looking for a Node.js Developer job to help build scalable backend applications. Excited to use technical skills in server-side development, debugging, and working with others to deliver software while continuing to learn the best ways to do things in the industry.

EDUCATION

SMBM National Public School, Dindigul
Computer - Mathematics

PROJECTS

Portfolio Website (sahulworks.me)

- Developed a responsive personal portfolio website to showcase projects, skills, certifications, and contact details with a clean, professional user experience.
- Integrated MongoDB for dynamic data management, making the site scalable, organized, and suitable for real-world deployment.

AI Business Plan Generator – AI Web App

- Built and deployed a Python and Streamlit application that generates structured business plans from user inputs using Grok AI API.
- Enabled downloadable PDF and DOCX report generation to deliver polished, shareable business documents.
