Summary

Computer Science Engineering student with strong proficiency in Java, Data Structures & Algorithms, and AI/ML. Skilled in designing and building scalable backend systems, RESTful APIs, and high-performance applications using modern development practices and system design principles.

Technical Skills

Languages: Java, Python, JavaScript, SQL

Frameworks & Libraries: Spring Boot, FastAPI, React, scikit-learn, Tailwind CSS

Tools & Platforms: AWS, Docker, Git/GitHub, MySQL

Concepts: REST APIs, Data Structures & Algorithms, System Design, AI/LLMs, RAG, Prompt Engineering

Experience

AccentoTechno Soft

Coimbatore, India

Python Developer Intern

May 2024

- Engineered an AI-powered Business Plan Generator in Python, integrating NLP/AI APIs to generate 99+ structured, data-driven business strategies per user.
- Built an interactive web application using Streamlit and Flask, reducing manual report preparation time by 10–12 hours per week.
- Automated downloadable report generation in PDF and DOCX formats, replacing manual formatting and enabling delivery of 50+ documents per week.

Projects

Topology-Based Stock Analysis System

Python, FastAPI, React, scikit-learn

- Architected a React + FastAPI full-stack application, exposing machine learning inference through scalable, modular REST APIs.
- Built an end-to-end stock analysis system applying Topological Data Analysis (TDA) and ensemble ML models, with backtesting validated on Nifty 50 market data.

Employee Attendance Management System

Java, Spring Boot, MySQL, REST API

- Engineered a Spring Boot backend using layered, clean architecture principles, exposing RESTful APIs for employee and attendance management.
- Designed a MySQL relational database with Spring Data JPA, implementing secure CRUD operations, input validation, and optimized data persistence.

AI Business Plan Generator

Python, Streamlit, Grok API

- Built an AI-powered Business Plan Generator integrating the Grok AI API, capable of producing 99+ tailored business strategies per user.
- Applied prompt engineering and automated document generation workflows to save users 10–12 hours per week, delivering comprehensive plans in PDF and DOCX formats.

Education

Sri Krishna College of Technology

Coimbatore, India

B.E. Computer Science Engineering; CGPA: 7.05

2023 – 2027

SMBM National Public School

Dindigul, India

Higher Secondary Education (HSC); 76.8%

2023

Courses & Certifications

- Programming with Java – NPTEL, IIT Kharagpur
- Cloud Computing – NPTEL, IIT Kharagpur
