

Sahul Hameed

Hyderabad, Telangana, India | sahul.hameed@email.com | yourcustomdomain.com

Summary

Computer Science Engineering student (Graduating 2026) with a strong foundation in full-stack development, machine learning, and Generative AI. Proven experience building scalable applications and leveraging local LLMs and AI-assisted workflows to drive innovation. Demonstrated ability to document technical specifications, collaborate in cross-functional teams, and solve complex problems. Seeking an Associate Software Engineer position to contribute to AI-enabled, data-driven solutions.

Education

B.Tech in Computer Science Engineering

University Name

Graduating 2026

Location

Technical Skills

Languages: Java, Python, JavaScript, HTML/CSS

AI & Machine Learning: Generative AI, Large Language Models (LLMs), CodeLlama, Prompt Engineering, Scikit-Learn, Pandas

Frameworks & Tools: React, Git, AI-Assisted Workflows (Copilots, Chatbots)

Core Competencies: Full-Stack Development, Technical Documentation, Software Testing, Requirement Analysis

Projects

AI-Powered Personal Coding Agent

Generative AI Development

Python, LLMs, Prompt Engineering

- Deployed and fine-tuned a local Large Language Model (CodeLlama) connected to a custom web interface to serve as a personal AI programming assistant.
- Applied practical knowledge of prompt engineering to optimize code generation, debugging, and solution development tasks.
- Leveraged AI-enabled workflows to significantly reduce development time, demonstrating early adoption of AI-assisted tools.

Real-Time One-on-One Messaging Application

Software Development

Java, React, Full-Stack

- Designed and developed a comprehensive real-time chat application from the ground up.
- Documented precise business requirements and developed technical specifications outlining data flow, architecture, and feature enhancements.
- Participated in rigorous testing of new messaging features to ensure a seamless and bug-free user experience.

Movie Recommendation Engine

Data Science

Python, Machine Learning

- Engineered a recommendation system utilizing mathematical similarity scores to match user preferences with extensive movie datasets.
- Demonstrated strong problem-solving mindset and practical application of data analysis techniques to uncover actionable insights.

Custom MP3 Hardware Player

Independent Innovation

Hardware, Embedded Systems

- Showcased learning agility and deep technical curiosity by designing a custom MP3 player featuring modern Type-C compatibility and Bluetooth integration.

Leadership & Extracurricular

Member <i>Rotaract Club</i>	Communication & Collaboration
• Actively collaborate with regional and cross-functional teams to organize events and drive community-focused initiatives. • Contribute innovative ideas and insights during team discussions to enhance project outcomes and problem-solving approaches.
